

LIQUID soap

FM ADVICE:

Liquid soaps, with convenient dispensers, are practical and more hygienic than traditional bars of soap. They are especially suitable in places where one soap is used by many people. They are a great solution for multi-person households and small or large companies.

Aromatic liquid soap moisturises and softens the skin making it silky smooth and pleasant to the touch. With a neutral pH (5.5) it gently cleanses and nourishes the entire body. Leaves a fresh, subtle scent on the skin.

LEATHER WAX conditioner

conditioning oils

LEATHER WAX conditioner

Protective wax made from natural beeswax with added conditioning oils. Designed for the treatment of surfaces made of smooth genuine and ecological leather. Intensively nourishes the leather and makes it softer and more flexible. It restores the natural colour and shine to the cleaned surfaces and prevents them from excessive drying and cracking. Recommended for cleaning leather furniture and car upholstery, as well as for fancy leather goods (bags, briefcases, suitcases, wallets, belts, gloves), leather clothing (jackets, coats, trousers), shoes, saddles and other leather articles.

You can also use the wax to clean leather. Just apply a bit of wax on a dirty surface with a soft cloth and polish it with circular movements until it is dry. In this way you will remove dirt, restore the lost shine of the cleaned objects and protect them from further dirt and damage.

Note!
Not suitable for suede and nubuck.

leather wax conditioner F 02

CAPACITY: 300 ml
PRICE: £9,00

for natural and synthetic leather

METAL cleaning PASTE

- ▶ contains corrosion inhibitors
- ▶ cleans and conserves

METAL cleaning paste

Concentrated cleaning paste quickly removes dirt and restores the shine to objects made of silver, gold, copper, aluminium, brass, stainless steel, chrome and nickel. The product formula ensures even treatment over all cleaned surfaces, built-in corrosion inhibitors slow the aging process and give long lasting protection. Thanks to these properties the paste can be widely used in the home on jewellery, silverware, clocks, fittings, stainless steel bathroom items, musical instruments etc. In the garden on fences, jardinières, metal lamps and garden furniture etc. Also in the garage for metal parts in cars, bicycles and motorbikes. The paste is designed for manual cleaning, it does not contain corrosive acids so it is safe for both the cleaned items, and for the skin.

Note!
Do not apply to the surface coated with metal (eg: gold, silver, nickel, chrome) or covered with paint.

metal cleaning paste U 07
